DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Improper to claim the negative limitation, "wherein a spring for causing the piston to resonate is eliminated."

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by JP 2003-50058. Since the axis recited in the claim is not limited to the longitudinal axis of the cylinder,

Art Unit: 3748

the claims read upon an axis perpendicular to the longitudinal axis of JP 2003-50058.

5. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Beale et al (5537820). Fig. 2 of Beale teaches a Stirling engine having a displacer 42 and a piston 40; and movement restricting means are provided for setting a limit of movement of the piston 40. There is no spring for causing the piston to resonate.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References cited on PTO-892 teach Stirling engines wherein there is no spring for causing the piston to resonate.
